Formatting Instructions For NeurIPS 2020

Anonymous Author(s)

Affiliation Address email

Abstract

- The abstract paragraph should be indented ½ inch (3 picas) on both the left- and right-hand margins. Use 10 point type, with a vertical spacing (leading) of 11 points.

 The word **Abstract** must be centered, bold, and in point size 12. Two line spaces precede the abstract. The abstract must be limited to one paragraph.
- 5 Added for testing purposes.

6 1 Introduction

- 7 Neural Networks are thriving in the modern society with software ranging from facial recognition
- 8 to language translation augmenting humans day-to-day. In this aspect, Machine Learning (ML) for
- 9 chemical sciences gains more and more value and therefore is the focus of an increasing amount of
- 10 research. In consequence, an increasing amount of data regarding molecules are gathered and labeled,
- multiplying the amount of information that can be used to train ML models to help chemical discovery
- 12 and molecule analysis to aid chemical discovery for drug development and molecule investigation.
- 13 To aid in the improvement of ML models, benchmarks have been developed. A benchmark in a ML
- setting, is a site where models are compared against an accumulation of datasets, where the datasets
- 15 are usually split into fixed training- and testing sets. The benchmark around which this project will
- be largely revolving is MoleculeNet. They tried a standardized approach for splitting their data, by
- 17 creating more ways in which these datasets can be split, that can be applied to every dataset they
- 18 have.

25

- 19 As the MoleculeNet paper was published in 2018, we try to find and use methods already used in
- 20 other context but not in the paper. We will set up a dataset-to-metric model for each benchmark using
- 21 new tools in four areas: splitters, featurizers, deep learning, and transfer learning. These results will
- 22 be compared against the best-known results from MoleculeNet. While we may not be able to enhance
- 23 the best-known results, we will formulate our accumulated knowledge for future exploration.

24 2 Related Work

3 General formatting instructions

- The text must be confined within a rectangle 5.5 inches (33 picas) wide and 9 inches (54 picas) long.
- 27 The left margin is 1.5 inch (9 picas). Use 10 point type with a vertical spacing (leading) of 11 points.
- 28 Times New Roman is the preferred typeface throughout, and will be selected for you by default.
- 29 Paragraphs are separated by ½ line space (5.5 points), with no indentation.
- The paper title should be 17 point, initial caps/lower case, bold, centered between two horizontal
- rules. The top rule should be 4 points thick and the bottom rule should be 1 point thick. Allow 1/4 inch

- space above and below the title to rules. All pages should start at 1 inch (6 picas) from the top of the
- зз page.
- 34 For the final version, authors' names are set in boldface, and each name is centered above the
- 35 corresponding address. The lead author's name is to be listed first (left-most), and the co-authors'
- names (if different address) are set to follow. If there is only one co-author, list both author and
- 37 co-author side by side.
- 38 Please pay special attention to the instructions in Section 5 regarding figures, tables, acknowledgments,
- 39 and references.

40 4 Headings: first level

- 41 All headings should be lower case (except for first word and proper nouns), flush left, and bold.
- 42 First-level headings should be in 12-point type.

43 4.1 Headings: second level

44 Second-level headings should be in 10-point type.

45 4.1.1 Headings: third level

- ⁴⁶ Third-level headings should be in 10-point type.
- 47 Paragraphs There is also a \paragraph command available, which sets the heading in bold, flush
- left, and inline with the text, with the heading followed by 1 em of space.

5 Citations, figures, tables, references

50 These instructions apply to everyone.

5.1 Citations within the text

- 52 The natbib package will be loaded for you by default. Citations may be author/year or numeric, as
- long as you maintain internal consistency. As to the format of the references themselves, any style is
- 54 acceptable as long as it is used consistently.
- 55 The documentation for natbib may be found at
- http://mirrors.ctan.org/macros/latex/contrib/natbib/natnotes.pdf
- 57 Of note is the command \citet, which produces citations appropriate for use in inline text. For example,
- 59 \citet{hasselmo} investigated\dots
- 60 produces
- Hasselmo, et al. (1995) investigated...
- If you wish to load the natbib package with options, you may add the following before loading the neurips_2020 package:
- 64 \PassOptionsToPackage{options}{natbib}
- 65 If natbib clashes with another package you load, you can add the optional argument nonatbib 66 when loading the style file:

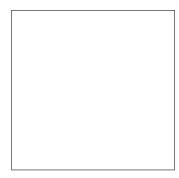

Figure 1: Sample figure caption.

67 \usepackage[nonatbib] {neurips_2020}

- 68 As submission is double blind, refer to your own published work in the third person. That is, use "In
- 69 the previous work of Jones et al. [4]," not "In our previous work [4]." If you cite your other papers
- that are not widely available (e.g., a journal paper under review), use anonymous author names in the
- 71 citation, e.g., an author of the form "A. Anonymous."

72 5.2 Footnotes

- 73 Footnotes should be used sparingly. If you do require a footnote, indicate footnotes with a number 1
- 74 in the text. Place the footnotes at the bottom of the page on which they appear. Precede the footnote
- vith a horizontal rule of 2 inches (12 picas).
- Note that footnotes are properly typeset *after* punctuation marks.²

77 5.3 Figures

- 78 All artwork must be neat, clean, and legible. Lines should be dark enough for purposes of reproduction.
- 79 The figure number and caption always appear after the figure. Place one line space before the figure
- 80 caption and one line space after the figure. The figure caption should be lower case (except for first
- word and proper nouns); figures are numbered consecutively.
- 82 You may use color figures. However, it is best for the figure captions and the paper body to be legible
- 83 if the paper is printed in either black/white or in color.

84 5.4 Tables

- 85 All tables must be centered, neat, clean and legible. The table number and title always appear before
- 86 the table. See Table 1.
- Place one line space before the table title, one line space after the table title, and one line space after
- 88 the table. The table title must be lower case (except for first word and proper nouns); tables are
- 89 numbered consecutively.
- 90 Note that publication-quality tables do not contain vertical rules. We strongly suggest the use of the
- booktabs package, which allows for typesetting high-quality, professional tables:
- 92 https://www.ctan.org/pkg/booktabs
- This package was used to typeset Table 1.

¹Sample of the first footnote.

²As in this example.

Table 1: Sample table title

	Part	
Name	Description	Size (μm)
Dendrite Axon Soma	Input terminal Output terminal Cell body	$\begin{array}{c} \sim \! 100 \\ \sim \! 10 \\ \text{up to } 10^6 \end{array}$

Final instructions

- Do not change any aspects of the formatting parameters in the style files. In particular, do not modify 95
- the width or length of the rectangle the text should fit into, and do not change font sizes (except
- perhaps in the **References** section; see below). Please note that pages should be numbered.

Preparing PDF files 98

102

103

104

105

106

108

109

110

111

112

113

114

118

- Please prepare submission files with paper size "US Letter," and not, for example, "A4." 99
- Fonts were the main cause of problems in the past years. Your PDF file must only contain Type 1 or 100 Embedded TrueType fonts. Here are a few instructions to achieve this. 101
 - You should directly generate PDF files using pdflatex.
 - You can check which fonts a PDF files uses. In Acrobat Reader, select the menu Files>Document Properties>Fonts and select Show All Fonts. You can also use the program pdffonts which comes with xpdf and is available out-of-the-box on most Linux machines.
 - The IEEE has recommendations for generating PDF files whose fonts are also acceptable for NeurIPS. Please see http://www.emfield.org/icuwb2010/downloads/ IEEE-PDF-SpecV32.pdf
 - xfig "patterned" shapes are implemented with bitmap fonts. Use "solid" shapes instead.
 - The \bbold package almost always uses bitmap fonts. You should use the equivalent AMS Fonts:

\usepackage{amsfonts}

followed by, e.g., \mathbb{R} , \mathbb{N} or \mathbb{R} , \mathbb{N} or \mathbb{R} . use the following workaround for reals, natural and complex:

```
\mbox{\newcommand}(\RR)_{I\!\R} \ \mbox{\newcommand}
115
           \newcommand{\Nat}{I\!\!N} %natural numbers
116
           117
```

Note that amsforts is automatically loaded by the amssymb package.

If your file contains type 3 fonts or non embedded TrueType fonts, we will ask you to fix it.

7.1 Margins in LaTeX 120

- Most of the margin problems come from figures positioned by hand using \special or other
- commands. We suggest using the command \includegraphics from the graphicx package. 122
- Always specify the figure width as a multiple of the line width as in the example below: 123

```
\usepackage[pdftex]{graphicx} ...
124
125
```

- See Section 4.4 in the graphics bundle documentation (http://mirrors.ctan.org/macros/
- 127 latex/required/graphics/grfguide.pdf)
- 128 A number of width problems arise when LATEX cannot properly hyphenate a line. Please give LaTeX
- 129 hyphenation hints using the \- command when necessary.

130 Broader Impact

- Authors are required to include a statement of the broader impact of their work, including its ethical
- aspects and future societal consequences. Authors should discuss both positive and negative outcomes,
- if any. For instance, authors should discuss a) who may benefit from this research, b) who may be
- put at disadvantage from this research, c) what are the consequences of failure of the system, and d)
- whether the task/method leverages biases in the data. If authors believe this is not applicable to them,
- 136 authors can simply state this.
- Use unnumbered first level headings for this section, which should go at the end of the paper. Note
- that this section does not count towards the eight pages of content that are allowed.

139 References

- References follow the acknowledgments. Use unnumbered first-level heading for the references. Any
- choice of citation style is acceptable as long as you are consistent. It is permissible to reduce the font
- 142 size to small (9 point) when listing the references. Note that the Reference section does not count
- towards the eight pages of content that are allowed.
